

<p>My feet, around my heels, developed this thick skin that appeared to be out of control.</p>
<p>Once it was soaked you could begin to remove it, but it was spreading.</p> <p>I used tea tree oil and kept after it and thought I had won the battle!</p> <p>However, it came back and I finally made an appointment with the podiatrist who was stumped.</p> <p>Since my visit wasn't until the following week, I decided to try and use the Pure Herb Olive Leaf and cancelled my follow up visit.</p> <p>Thank you, Olive Leaf!</p> <p>--♦♦ R.M., Collingswood, NJ [USA]</p>
